## TR SERIES DUAL POLE MASTER DISCONNECT SWITCH

500A • DPST • IP67/IP69k • Integrated Lock-Out Tag-Out

## Description

Cuts all battery power from vehicle electrical systems with applications needing switching of two circuits, or both positive and negative. 500A continuous current rating for each of the two circuits (using $2 \times 4 / 0$ input and $2 \times 4 / 0$ output cables). Can be used to switch two vehicle voltage circuits simultaneously ( 24 V and 12 V ). Disconnect a battery or multiple batteries, in either the positive or the negative line.

## Features and Benefits

- Ingress protection to IP67 and IP69K means that the switch can be mounted in exposed locations on the vehicle.
- Drop-in replacement for competitive Master Disconnect Switches, with higher vibration and shock capabilities.
- Direct lockout/tagout capability in On or Off position, with padlock or hasp.
